

“I’d built new offices twice before and my experience with Renier was by far the best.

My architect specializes in dental practice design, and our facility is cutting edge when it comes to orthodontics. We started with a shell and Renier Construction was involved in the very beginning. They immediately established an outstanding relationship with the architect who really enjoyed working with them. From pre-construction through mid-construction and completion, we were all on the same page. Everything was top quality...my new offices and the relationships.

I have nothing but great things to say about Renier.”
