Integrity.

“ Renier helped us to sort through the complexities of the GM Facility Image Program. ”

When we received the GM program guidelines and saw there were hundreds of pages, we nearly died. We realized that there was no way for us to understand all the requirements of the program - so we hired Renier.

They had a great deal of experience and had successfully completed more than 13 dealerships with GM guidelines. We knew they knew what they were doing.

It was surprising how little we had to do, and that allowed us to focus on our business. ”
