

Dan Glass
Vice President and General Manager
Courtesy Acura

“ Renier met or exceeded all the deadlines we established.

When you only need to hire a general contractor every 15 to 20 years you want to make sure that the results are of the highest quality.

We used Renier for two projects – the demolition and building of our used car area and the remodeling of the Acura showroom originally built in 1986.

Renier did very well interpreting our direction and intention for the projects and both were completed on time and under budget. The communication flow was a 10 and we were able to reach the project manager anytime we needed to.

The projects were done to specification and were under budget. ”
