

Integrity

“Working with Renier Construction and their design-build process was great.”

“Renier provided a comprehensive budget for us up front and handled everything from design to permitting to construction and closeout. Our project was completed on schedule as they promised. Our 8,000-square-foot warehouse facility sits on two acres and had numerous building code requirements that needed to be met in order to get zoning approval. **Renier proposed ways to meet all the requirements in the most affordable and efficient ways.**”
