## “ When the fire destroyed our building, we were at a total loss.

**Ohio Water and Waste Supply Company, Inc.** is a wholesaler of underground sanitary and storm piping.

We had no experience with the process of rebuilding, and since we were temporarily living out of five trailers, there was no time to bring in an architect first. That's why we called in Renier Construction. They gave us a schedule based on their design-build approach and really delivered on it. We had weekly meetings for making decisions, and the Project Manager was sincere and a good communicator. He bent over backwards to keep us informed, almost daily. Of course, Renier's subcontractors were also a 'class' act. We were delighted with the whole process.

## That's why we chose Renier.”
