

Integrity

"I found Renier Construction while I was looking for a good construction company in the medical space.

"I saw their website, the work they had done – it was remarkable. Within 24 hours of me reaching out, I was contacted. I was impressed. Renier was on point from the beginning.

We met often and the team was accessible at all times. Responsive down to a 30-minute window and this was consistent. Aside from communication, coordination was notable. We had all of the team players in the first meeting, immediately. On-site, the first visit. They were all there. Renier coordinated extremely well with the architect and city of Westerville to ensure we had necessary permits and could start the build.

The construction took 60 days – it was extraordinary. **The finished space is exactly what we were expecting. It's beautiful. And if anyone asks what I think about Renier I say, "Absolutely!! Use them!"**
