

“Renier Construction’s team approach proved far superior to the traditional method when it came time to expand our warehouse. We had looked at all the options, then Renier told us about their Design/Build method which allowed us to bring them in early. They worked with us and the architect from the beginning, maintaining costs and keeping the project on schedule. And, with Renier’s ability to anticipate problems, they turned our project around in only five months, and **created a win-win situation for everyone.”**
